Rangiora

*'Smart Silos are brilliant!! Compared to Ravensdown silos, they are one of the biggest timesavers!*

*For example, we filled up the Smart silo with Urea two months before we got it out... when it came to getting it out, it only took a couple of quick minutes to loosen it and it also had very little lumps.*

*However, when using the Ravensdown silo after two months of storage it took 10-15 minutes to get it to flow satisfactory. Even then, it still blocked with lumps with the first couple of loads. I'd go for the Smart silo anyday!'*

*R.J Larsen*
